**Download**

I don't know about you, but I'm getting tired of downloading single pieces of this game. I'm sick of lugging the files for a video that's not even complete. I'm sick of wasting my life away waiting for the game to download. I've downloaded over 30 pieces of this game. There are more coming. I am putting them all on my private server. I haven't spent hours putting a single model together because you should only have to download a single model. (And no, this isn't just an excuse to get rid of pre-orders, although it is why I will no longer be accepting orders for this game. You will be buying the game if you want to play it, and it's coming soon. You can be patient and wait for it if you want, but I'm not going to force you to do that, either.) I'm offering this for free to everyone who already owns the game, and I'm going to stream the game on YouTube once the server is ready, so you don't have to download single pieces. I've decided it's my duty as a digital bastard to make this as easy as possible, and my OCD makes me want to build a truly complete game. It's much more convenient to just buy the whole thing at once, so that's what I'm offering. I will still be sending out updates for new content, but it's easier to just get the whole game. If you already own a digital copy of this game, you can give it to your friends who don't. Let's get rid of digital, and embrace the future of game ownership. Thank you, all of you, for giving me this opportunity, and helping me put together this dream I've been living for over a year. It's been so hard trying to put the pieces together. I will do my best to make a truly complete game in the future, and I hope you're a part of it. This is for you, everyone. Thanks for your support. C. \*I'm buying the game to support my favorite company, so if you don't like me doing this, well, you' 82157476af
